

Test Report for a General-Purpose Disinfectant Product

(Adapted) BS EN 1276:2019

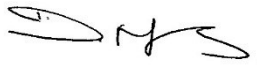

Requirements of the Standard:

The test product shall demonstrate at least a 5 decimal logarithm (lg) reduction when tested in accordance with this standard under simulated clean or dirty conditions.

Conclusion:

The product Sanzonate Ozone Solution met the log reduction requirements as specified in EN 1276 (5 lg) with a 5 min contact time for the organisms tested.
